

Braivs Ustiugov

Frontend/Full Stack Web Developer · Thailand

I'm a Frontend/Full Stack developer with 6+ years of commercial experience, including 14 months in iGaming. My main focus is frontend (React, Next.js, TypeScript); I also handle backend logic in Node.js (Express) — API routes and WebSockets. Hands-on PixiJS.

Recently I've built an iGaming-fintech product, a high-load iGaming platform, and Web3 apps. Previously 5 years as a backend developer (C#/C++) in medtech. Open to remote Frontend/Full Stack roles with a frontend focus, or relocation.

My core stack 🛠️: TypeScript, React, Next.js, Redux Toolkit/RTK Query, SCSS, Node.js (Express).

Also: Web3 (Reown, MetaMask), MUI, Radix UI, Firebase, Axios, Formik, Git, Docker, Postman, Cursor, GitHub Copilot.

EXPERIENCE:

1). 06.2025 – 11.2025: Frontend Developer at Next On Pro (providing top-tier payment solutions for leading iGaming businesses)

- Developed the iGaming-Fintech ecosystem **ZenexHub** — an investment crypto application featuring crypto-wallet authentication, a personal account and RevShare investment pools for funding CPA iGaming traffic and earning a percentage of the platform's revenue (GGR), offering both conservative and high-yield options;
- Created **ZenexCoin** — landing page for this platform;
- Built a landing page and a Telegram mini-app with crypto games for live events: **TOKEN2049, SBC Summit Lisbon 2025**, etc.;

2). 09.2024 – 04.2025: Middle React Frontend Developer at Cyprus-based, iGaming platform under NDA.

- Built and maintained high-load responsive interfaces with React, SCSS Modules, Redux Toolkit and RTK Query; implemented mobile-first layouts for seamless cross-device experience;
- Developed and integrated Node.js API routes + WebSockets for real-time features (balance, sessions, live updates);
- Created modular components: bonuses, VIP system, dashboard, personal area;
- Participated in architectural discussions, proposed UI improvements and performance optimizations;
- Collaborated closely with backend developers, designers and PMs; influenced team decisions while writing clean, maintainable code.

Stack: React, Node.js, TypeScript, RTK Query, Redux, WebSockets, SCSS, MUI, Jira.

3). 04.2023-08.2024: Next.JS Developer at Pet project - Namazon Club (Content platform for mixed wrestling / submission grappling videos)

- Purchased an incomplete ThemeForest template and turned it into a multi-page Next.js application (TypeScript migration, architectural fixes, content structure for video catalog and updates).
- Built and maintain the public-facing site with video catalog, membership packages and content updates; integrated payment flow that generates real revenue (PayPal + payouts);
- Coordinated with 3 external video content suppliers;
- Used modern AI-assisted development workflow (Cursor AI & GitHub Copilot) throughout the project.

4). 05.2021-04.2023: React Frontend developer at Project Hydro (Sweden-based, web3 decentralized ecosystem)

- Increased user engagement by 103% via developing and optimizing a website for Keresverse (web3 first person hero shooter). Main sections and flows implemented: signin/signup, profile, game items and locations marketplace, friends list and messenger - using Firebase;
- Enhanced legacy code for the crypto exchange service, including Metamask integration and support for new cryptocurrency chains;
- Customer reviews became more than 72% positive after my implementation of new version of HydroBridge - a web3 app to swap Hydro token between networks;
- Resolved 68% of all bugs in HydroBridge and Keresverse. Increased stability by contributing to HydroSwap - a web3 app for swap of various tokens (USDT, BNB, ETH and more) to Hydro tokens.

Stack: React, Redux-toolkit, Firebase, Web3, TypeScript, Html, SCSS, Formik, MaterialUI;

↓ See next page

5). 01.2019-04.2021: Self-Employed frontend developer

- Developed apps and websites for various business clients (transport, cosmetic service, video devices rent, news...) with: React, React-router-dom, Redux, redux-thunk, Axios, Formik, Material libraries, RestAPI, Axios, Formik, Material UI, HTML, SCSS;
- Developed SPA CRM for night clubs, including a content management system for visitor monitoring with KYC features;
- Performed Unit Tests;
- Implemented Storybook for modules of the app demonstration to stakeholders;
- Created websites with HTML, CSS and JS. Used preprocessors SASS, PUG, and Bootstrap framework

6). 06.2013-12.2018: Backend developer at SP.ARM (medtech b2b CRM system)

- Developed a system of medical exceptions for the blood transfusion service in the information system qMS. Made on Mumps language;
 - Implemented a search for a patients data in the database using a universal electronic medical card (UEC);
- Developed electronic document signature modules by C++ and C#, using the .NET Framework.

SKILLS AND TOOLS:

React / Next.js / TypeScript / JavaScript / Redux Toolkit / RTK Query / Node.js / Express / WebSockets / Web3 / Reown / MetaMask / PixiJS / HTML5 / SCSS / CSS / MUI / Radix UI / Formik / Axios / REST API / Firebase / Git / Docker / Postman / Unit Tests / Storybook / Jira / Cursor / GitHub Copilot / C# / C++ / .NET

English B2, Russian Native

EDUCATION:

2021: Frontend Development middle + (React / Redux / Typescript) | IT incubator | Belarus

2012: Specialist degree in Computer and automated systems software, Faculty of Technical Cybernetics | St. Petersburg Polytechnic University
