

Braivs Ustiugov

Frontend ReactJS/NextJS Developer located in Thailand

I'm a front-end developer with 6+ years of commercial experience in Web3, crypto-fintech and high-load web applications.

I've built responsive web apps across crypto fintech, iGaming, e-commerce.

My stack 🛠️ React, Next.js, Redux, Web3, TypeScript, Axios, JavaScript, SASS / SCSS, RTK Query, HTML5, Formik, Material UI, Git, Docker, Postman, Firebase.

I also handle backend logic (API routes, WebSockets).

Previously, I spent 5 years as a backend developer (C# / C++) in medtech systems.

Now I'm open to remote Frontend roles.

EXPERIENCE:

1). 06.2025 – 11.2025: Next On Pro: Frontend Developer (providing crypto payment and fintech solutions for high-load platforms)

- Developed the iGaming-Fintech ecosystem **ZenexHub** — an investment crypto application featuring crypto-wallet authentication, a personal account and RevShare investment pools for funding CPA iGaming traffic and earning a percentage of the platform's revenue (GGR), offering both conservative and high-yield options;
- Created **ZenexCoin** — landing page for this platform;
- Built a landing page and a Telegram mini-app with crypto games for live events: **TOKEN2049, SBC Summit Lisbon 2025**, etc.;

2). 09.2024 – 04.2025: Middle ReactJS Frontend Developer (Cyprus-based, iGaming project under NDA).

- Built and maintained responsive user interfaces with React, SCSS Modules, and modern build tools;
- Developed and optimized mobile-friendly layouts for seamless cross-device experience;
- Integrated REST APIs and WebSockets for real-time updates (e.g., balance, sessions);
- Developed modular components: bonuses, VIP system, dashboard, and personal area;
- Participated in architectural discussions, proposed UI improvements, and optimized performance;
- Wrote clean, maintainable code and contributed to team decisions;
- Collaborated closely with backend devs, designers, and PMs to ship features smoothly;
- Worked with state management tools: Redux Toolkit and RTK Query.

Stack: ReactJS, TypeScript, RTK Query, Redux, WebSockets, SCSS, MUI, Jira.

3). 04.2023-08.2024: Next.JS Developer (video marketplace service under NDA).

- Developed multi-page website from scratch with: NextJS, Redux, Html, SCSS, Bootstrap, Radix, RTK Query;
- Developed and implemented app sections and features: login, personal dashboard, checkout and PayPal integration;
- Made UI-kit for this project;
- Managed development team from 3 members to launch product MVP.

4). 05.2021-04.2023: ReactJS Frontend developer at Project Hydro (Sweden-based, web3 decentralized ecosystem)

- Increased user engagement by 103% via developing and optimizing a [website for Keresverse](#) (web3 first person hero shooter). Main sections and flows implemented: signin/signup, profile, game items and locations marketplace, friends list and messenger - using Firebase;
- Enhanced legacy code for the crypto exchange service, including Metamask integration and support for new cryptocurrency chains;
- Customer reviews became more than 72% positive after my implementation of new version of HydroBridge - a web3 app to swap Hydro token between networks;
- Resolved 68% of all bugs in HydroBridge and Keresverse. Increased stability by contributing to HydroSwap - a web3 app for swap of various tokens (USDT, BNB, ETH and more) to Hydro tokens.

Stack: React, Redux-toolkit, Firebase, Web3, TypeScript, Html, SCSS, Formik, MaterialUI;

5). 01.2019-04.2021: Self-Employed frontend developer

- Developed apps and websites for various business clients (transport, cosmetic service, video devices rent, news...) with: React, React-router-dom, Redux, redux-thunk, Axios, Formik, Material libraries, RestAPI, Material UI, HTML, SCSS;
- Developed SPA CRM for night clubs, including a content management system for visitor monitoring with KYC features;
- Performed Unit Tests;
- Implemented Storybook for modules of the app demonstration to stakeholders;
- Created websites with HTML, CSS and JS. Used preprocessors SASS, PUG, and Bootstrap framework

6). 06.2013-12.2018: Backend developer at SP.ARM (medtech b2b CRM system)

- Developed a system of medical exceptions for the blood transfusion service in the information system qMS. Made on Mumps language;
 - Implemented a search for a patients data in the database using a universal electronic medical card (UEC);
- Developed electronic document signature modules by C++ and C#, using the .NET Framework.

SKILLS AND TOOLS:

React / Redux-Thunk / **Redux** / Redux Toolkit / RTK Query / **JavaScript** / Next.js / **TypeScript** / Firebase / AXIOS / REST API / Unit Tests / StoryBook / Formik / Material UI / Bootstrap / Git / Postman / HTML5 / Flex / Grid / CSS / SCSS / **Web3**

English B2, Russian Native

EDUCATION:

2021: Front-end Development middle + (React / Redux / Typescript) | IT incubator | Belarus

2012: Bs in Computer and automated systems software, Faculty of Technical Cybernetics | St. Petersburg Polytechnic University
